After seven years of research on the structural drivers of HIV, the STRIVE research consortium – with co-hosts UKaid/DFID, UNAIDS, UNDP and SRHR Africa Trust – gather policy makers, implementers, civil society advocates, funding agencies and researchers for a unique day of debate and exchange. Drawing on evidence and experience, panellists and participants will address burning questions for the AIDS response such as:

- What works to tackle the structural drivers of HIV?
- How can evidence inform policy-making and programme implementation?

Dear Friend,

I am writing to bring your attention to the STRIVE pre-conference session at this year's 22nd International AIDS Conference.

STRIVE, a research consortium working in Asia and Africa, will host a [one-day session](#) on 21 July, to synthesise evidence on the structural drivers of HIV. The session, co-hosted by UKaid, UNDP and SRHR Africa Trust, offers a unique day of debate and exchange. Two panels – led by policy makers, implementers, civil society advocates, funding agencies and researchers – will engage all participants in discussing how to address structural drivers in order to (1) achieve the sustainable development goals and (2) deliver comprehensive HIV prevention programmes.

Registration is now open for the event which is free to all who are registered for the main conference. For those who wish to attend only this preconference and not the main conference, day passes are available for on-site purchase in the registration area from 20 July.

To find out more about the event and register, visit the STRIVE website: <http://strive.lshtm.ac.uk/AIDS2018>

Please feel free to forward this email to others who may be interested.

Key messages sample content

Share the following key messages online with the follow up sentence below linking it back to the pre-conference session.

- Structural interventions can achieve HIV and other health and development outcomes.
- Biomedical prevention requires attention to structural factors if it is to succeed.
- Co-financing: multiple payers can finance structural interventions with multiple benefits.

+ Follow up sentence
